QUICK INSTALLATION GUIDE

The Comfort module allows you to monitoring indoor air quality, temperature and hygrometry in another place than the e-sylife Kub: bedroom, office …
It's also used as a repeater and extends the range of your e-sylife system (about 30m) for other modules.

Connecting the Comfort Module

- Add the Comfort Module to your installation by logging into your customer account, click on "My Home " icon, then "My modules". Click "ADD MODULE" and enter the module number and the security number found on the back of the module.
- Connect the mini USB of the power cable into the plug on the back of the box.
- Connect the USB of the power cable into the transformer, then plug this one into an electrical outlet. It could appear "not connected" (NC) during the first 2 hours.

<u>Your Comfort Module is now ready to go.</u>

For more details please read the user's guide, available in your "Customer account".
