QUICK INSTALLATION GUIDE

The Temperature module allows you to monitoring the temperature in an sensitive environment: refrigerator, freezer, wine cellar,… and to be notified in case of a reached limit.

Connecting the Temperature module

- Add the Temperature Module to your installation by logging into your customer account, click on "My Home   " icon, then "My modules". Click "ADD MODULE" and enter the module number and the security number found on the back of the module.
- Wait a minute.
- Stay close to the Kub when you remove the tab from the battery of the Temperature module to put the module into service. After you can put the module at its ultimate placement. It could appear "not connected" (NC) during the first 2 hours.

<u>Your Temperature Module is now in ready to go.</u>

For more details please read the user's guide, available in your "Customer account".
